#get help for shell builtin  
pwd: pwd [-LP]  
Print the name of the current working directory.  
  
Options:  
-L      print the value of $PWD if it names the current working  
        directory  
-P      print the physical directory, without any symbolic links  
  
By default, `pwd` behaves as if `-L` were specified.  
  
Exit Status:  
Returns 0 unless an invalid option is given or the current directory  
cannot be read.  
islam@DESKTOP-D8BECR5:~$ ls --help  
Usage: ls [OPTION]... [FILE]...  
List information about the FILES (the current directory by default).  
Sort entries alphabetically if none of -cftuvSUX nor --sort is specified.  
  
Mandatory arguments to long options are mandatory for short options too.  
-a, --all          do not ignore entries starting with .  
-A, --almost-all  do not list implied . and ..  
--author          with -l, print the author of each file  
-b, --escape       print C-style escapes for nongraphic characters
```
